May 12, 2020

To whom it may concern:

With this letter I confirm that Tyler Russin was a Remote Data Science Intern for Lambda School Labs working with the Center for Advanced Defense Studies (C4ADS) under my supervision from March 2020 to May 2020. C4ADS is a nonprofit organization dedicated to providing data-driven analysis and evidence-based reporting on global conflict and transnational security issues. In his nearly 2 months with us, Tyler contributed to a machine learning project using trade data to detect potentially illicit trade in nuclear dual-use goods to map the nuclear fuel trade in conflict regions. Tyler was an excellent addition to the team, he approached this project with a responsible, professional work ethic, and has consistently impressed myself and his peers with his ingenuity. He seemed to me to be very hard-working, and shows great potential to contribute to any organization willing to employ him. Please feel free to reach out any time with questions, you can reach me at patrick.baine@c4ads.org or call me at (202) 845-3795.

Sincerely,

Patrick Baine
Program Director, Data & Technology
